LIQUID PROPULSION

2022-2023 SPONSOR PACKAGE

Meet the Team

ABOUT US

Liquid Propulsion is an engineering design team at the University of Florida that specializes in liquid rocket propulsion systems. Our team's goal is to be the first undergraduate team in the country to launch and land a liquid-propellant rocket.

LEADERSHIP

Sameer Ponnaluri

David Delgado

Jiyansh Agarwal

Membership

Our 81 members are currently pursuing BSE and BAS degrees within a wide variety of unique fields.

- Aerospace Engineering
- Biological Engineering
- Chemical Engineering
- Computer Science
- Digital Media Design
- Electrical Engineering
- Industrial Engineering
- Mechanical Engineering.

Events

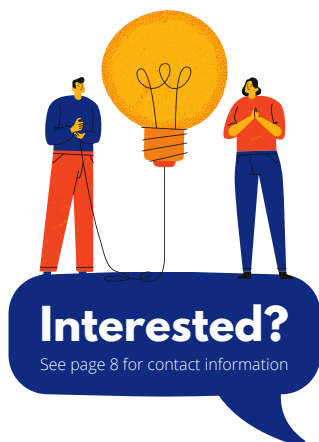

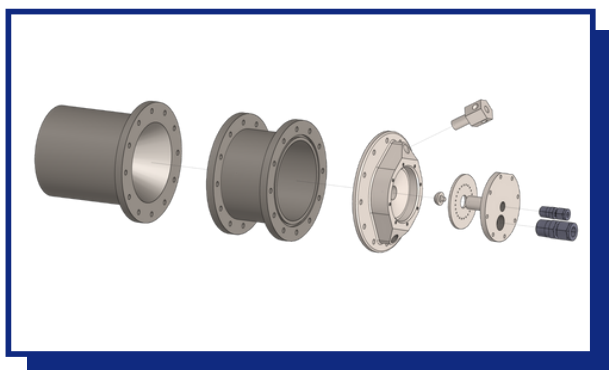

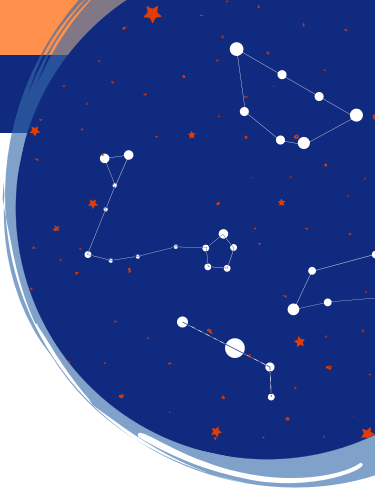

By sponsoring Liquid Propulsion, your business gains access* to several key events with our members.

- Corporate Dinner Social
- Critical Design Reviews
- Lunch and Learns
- Resume Reachouts
- Saturday Engine Tests

*Select events correspond to different levels of sponsorship

Corporate Dinner

A two-hour panel and lunch/dinner designed to allow our members to ask engineering professionals questions regarding their industry experience and technical origins. This year will mark the first time we are holding this event so we are excited to welcome all types of potential partners.

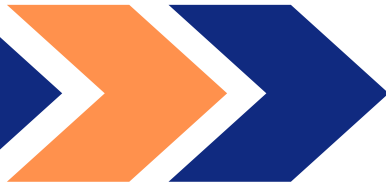

A series of short workshops focused on facilitating career connections between our partner firms and internal members. Sessions will include resume reviews, project explanations, and interview tips for undergraduates looking to progress in engineering.

Lunch...

and Learn!

2022-2023 Annual Plan

Continuous Improvement

To support the technical, professional, and social development of our members, we are developing a new department within our club. The newly established Hopper Design Department will soon enable us to initiate the first steps towards a recyclable launch vehicle.

Nov

Sparrow V1 Hotfire Test

Jan

Hopper Final Design Completion

Feb

Sparrow V2 Design Completion

Mar

Hopper Testing

External Project Aquisition

We are always searching for new and innovative ways to support our members as a team. This year, Liquid Propulsion is happy to sponsor several members to attend AIAA's annual aerospace research symposium. Research and industry projects will enable us to take our organization to the next level!

Why Sponsor Liquid Propulsion?

Exposure to Future Leaders

By sponsoring UF Liquid Propulsion, your company will gain substantial access to our members who have dedicated their time and efforts towards bettering their academic and professional careers. Sponsorship allows your representatives to connect with our members on an intrapersonal level, giving your company a unique edge in the hunt for interns and entry-level hires. By providing your advice and professional experiences, your company will be instrumental in shaping future generations of technical leaders.

Brand Presence in UF MAE

Partnering with us will open up new avenues of positive public relations for your business. We will share your company's brand in a variety of ways including ad placement packages, social media highlights, professional mentions, and networking deals depending on your level of sponsorship. Historically, our members have gone on to work with top aerospace employers such as SpaceX, Blue Origin, NASA, and Firefly. Sponsorship allows your representatives to foster potentially lucrative business connections for the future.

Tax-Deductible Donations

By donating funds, intellectual property, or materials to UF Liquid Propulsion, your company may be eligible to claim a federal tax deduction less than or equal to the value of your donation. As UF Liquid Propulsion receives partial funding courtesy of the University of Florida, all donations from your company directly allow our members to cultivate new projects using your funds or manufactured product(s). Sponsorship allows our members direct exposure to your products and boosts your company's future product demand.

On Behalf of the UF Liquid Propulsion Team...

Thank you. Whether you're simply curious about our club or you're here looking for the future of your company, we truly appreciate your time. Every day, we strive to represent the very best of the aspiring engineers here at the University of Florida, and as part of that, we recognize the opportunities that companies such as yours can provide to our members. Please see the below contents if you or your company is interested in establishing a line of connection with UF Liquid Propulsion.
