

Space-Based Interceptors & Strategic Stability

A new research project at the Georgia Institute of Technology

Georgia Tech
Engineering Space
Policy Laboratory

Who we are

Thomas González Roberts

Lab Director

Assistant Professor, Aerospace Engineering
and International Affairs

Nathan O'Brien

Project Co-Lead, Engineering

MS Student, Aerospace Engineering

Fernando Miranda España

Project Co-Lead, Policy

PhD Student, International Affairs

Background

Underwhelming history of SBI modeling

Source: APS Report 2004

The Golden Dome for America

Source: The White House Galleries

What we are doing

1. Interactive SBI constellation modeling tool
2. Peer-reviewed publication on modeling tool's methodology

Input: User-defined Missile Threat

Output: Optimized SBI Constellation

What we are doing

3. Matrix of SBI configurations and policy implications

Scenario-based SBI configurations

Rogue Threat

Near-Peer Threat

Global Threat

What we are doing

4. Two Workshop reports w/policy recommendations

 Geneva, Switzerland, Fall 2026

 Washington D.C., USA, Spring 2027

What we are doing

5. Targeted brief for allied governments and stakeholders

Canadian Government

State delegations to the
OEWG on PAROS

NATO Allies

U.S. Space and Missile
Defense policy leaders

What we are doing

6. Public-facing **fact sheet** or visual explainer
